Education

University of South Carolina – Columbia, S.C.	August 2024 -May 2028
<i>Bachelor of Science in Computer Information Systems</i>	<i>Cumulative GPA: 3.0</i>
Minor in Business Information and Cybersecurity	

Skills

Programming Languages: C++, Java, Visual Basic, VS Code, Eclipse
Software Applications: Microsoft Suite (Excel, Word, PowerPoint)
Operating Systems: Windows
Technical Strengths: Analytical problem-solving/Technical Communication/Team Collaboration/Learning new tools and technologies

Related Experience

HOPE (Nonprofit Organization)- Columbia, S.C.	September 2024 – May 2025
<i>Technical Design and Organization Member</i>	
- Designed and developed custom 3D-printed assistive devices by gathering requirements, analyzing constraints, and translating user needs into functional technical solutions. - Applied structured problem-solving and iterative testing to ensure designs met safety, usability, and performance requirements. - Used Fusion 360 (CAD) to model, refine, and document technical designs with attention to precision and accuracy. - Collaborated with team members to manage project timelines, coordinate deliverables, and communicate technical details clearly - Helped organize campus events and maintain relationships with external organizations, strengthening communication and documentation practices.	

Projects

Interview Development Design Project- Colombia, S.C.	January 2026- Ongoing
<i>Design/Coding Team Member</i>	
- Designed and developed a structured interview preparation system to help college students majoring in CS improve technical and behavioral interview performance. - Built organized data structures and algorithms practice modules with guided learning paths to reduce overwhelm and improve retention. - Used VS Code/JAVA with development team members to collaborate and design how we wanted it to operate, with the types of questions, and added gamification to the system. - Created a behavioral interview framework using the STAR method to help users deliver clear, structured responses.	

- Analyzed limitations of existing platforms (e.g., lack of structured guidance) and implemented improvements focused on process-based learning and interview readiness.

Relevant Course Work

- Computer Programming (Java, C++, VS code)
- Algorithmic Design I & II
- Computer-Aided Design

Leadership & Involvement

National Society Of Black Engineers (NSBE) – Society Member**May 2025 – Present**

- Participated in professional development workshops and technical sessions focused on engineering and computing skills.
- Engaged in networking events and career development activities to strengthen technical and professional competencies.
- Supported initiatives promoting diversity, collaboration, and professional growth within technical fields.
