

Name of website: Tri-Shield Security

Description: Tri-Shield Security is a professional cybersecurity website created for a future business focused on protecting organizations from modern cyber threats. The website will feature a modern, technology-focused design that represents security, trust, and innovation. Visitors will be able to explore services such as network security, threat monitoring, vulnerability assessments, and incident response. It will also highlight the company's long-term goal of pursuing government contracts and providing cybersecurity solutions to public-sector organizations.
